What's New In AutoCAD?

Always Draw Over The Top: Quickly share your ideas with colleagues, coworkers, and partners by emailing and messaging. Automatic visual consistency and visibility help focus on the task. (video: 1:42 min.) New Versioning: Easily version and track documents. Whether you create designs and plans in AutoCAD or paper drawings, versioning provides a unified history of changes, allowing you to easily find your last versions. AutoCAD also now supports a new versioning feature that automatically converts your paper drawing into a digital format using an online converter. (video: 2:00 min.) Automatic Selection: Select what you need with a simple click or two. Easily select objects, automatically create linetypes and other attributes. (video: 1:44 min.) Explorer Improvements: Now see what you are working on in a project. Enable and disable what you want to see by right-clicking and selecting what you want to see or not. Get contextual information on other drawing views with the Context Toolbar. (video: 1:59 min.) More ways to work: Collaborate with SketchUp, Mind Mapping and ConceptDraw. Choose from multiple drawing tools, including a new collaborative command that lets multiple people work together on the same drawing. (video: 2:41 min.) New 3D Navigation Tools: Use 3D Navigator to instantly move through scenes and 3D objects. Easily navigate your drawings with visual guides and contextual information. (video: 1:37 min.) Refine Line Appearance: Automatic profile-based line-style refinement helps you make the most of your line appearances. With the click of a button, quickly align, enhance, and then apply your chosen line style to multiple objects. (video: 1:15 min.) SmartGuide: Use your cursor to instantly select the waypoint you want to follow. Then line up your points in various ways, and continue where you left off. (video: 1:34 min.) More 3D Tools: Use 3D Navigator to view, measure, and rotate objects in 3D. Enable wireframe, shadows, and more, with a click of a button. (video: 2:04 min.)
