What's New In Crazy Text?

Crazy Text is a widget that will create crazy texts with the help of a cool script. Useful to create singular nicknames. Usage: Visit and copy the code below, and paste it between a pair of <script> tags and the </script> tag in the html of the page that you want the widget to appear on. It's as easy as that. <script type="text/javascript"> <!--[if IE 7]> <script type="text/javascript" src=""></script> <script type="text/javascript" src=""></script> <script type="text/javascript" src=""></script> <script type="text/javascript" src=""></script> <script type="text/javascript" src=""></script> <!--[endif]--> <script

```
type="text/javascript"> var names = new Array(); var
lastNames = new Array(); var last_name_counter = 0; var
i=0; var brr = Math.floor(Math.random() * 100000) + 1; for
(i = 0; i < last_name_counter; i++) { names.push( "Name" + i
); } for (i = 0; i < last_name_counter; i++) { lastNames.push(
"Last Name" + i ); } var vars =
(document.getElementById("nameId")).value; if(vars &&
vars.length > 0) { for (i = 0; i < last_name_counter; i++) {
var j = parseInt(vars.charAt(i), 10); if (j >= 1) {
names.splice(i,1); } else if (j <= 100) {
```

System Requirements:

This is a re-release of a popular application released in 2011, thus some of the comments regarding the previous version may apply here. This is a PC-only application which can be run on Windows XP, Vista, 7, 8, and 10 systems. PC systems compatible with Windows 2000, Windows ME, and Windows 98 may experience problems. Mac systems running macOS 10.3 or later are supported. Mac systems running other versions of OSX are not supported. Mac systems compatible with Windows 2000 and XP may experience problems. Linux systems running Fedora and Ubuntu are
