Experience more and get updated automatically on our website at: consumption of a lipid diet during pregnancy and lactation in rats. The maternal intake of fatty acids may affect the health of the offspring and the adequacy of the food supply to the mother's body. To test this hypothesis, female Wistar rats were fed diets containing either 0.3 or 1.2% safflower oil as the dietary lipid. At the end of the 4-wk experimental period the female rats consumed 2.9 and 3.5% of the total energy intake, respectively, from the lipid component of the diets. Following weaning, the pups consumed approximately 5.0% of the total energy intake from the fat consumed by the mothers during pregnancy and lactation. The maternal intake of the diets was determined using a differential weighing technique. The fat content of the diets was determined by a non-enzymatic method, and the fatty acid composition of the fat was analyzed by a capillary column gas chromatographic method. The results indicate that the dietary lipid source affected the diets consumed by the mothers and had some effect on the fatty acid composition of the milk. The results do not show that the maternal consumption of a specific lipid diet is detrimental to the pups, because the total fatty acid content of the mothers' diets increased. Although the body weights of the offspring increased with increased maternal intake of the lipid diet, the change was not statistically significant. No differences were found in pup survival, pup gain, or pup mortality between the two groups.Q: Preventing table-to-html conversion in Eclipse

Elvis Hines Elvis Hines (March 23, 1936 – August 18, 2015) was an American country music singer best known for his solo career and for his role as one of the original members of Porter Wagoner's Grand Ole Opry house band. Biography Early life Hines was born in Hendersonville, North Carolina, on March 23, 1936. While a student at East Henderson High School in Hendersonville, he began singing and playing guitar on the football team. He won a talent contest in Los Angeles after which he joined his older brother and cousin in a band headed by Bill Lillard and played the Grand Ole Opry in 1953. While performing regularly on the Opry he became friends with another young singer, Johnny Cash, who changed his name to "Elvis Presley." In 1956, Hines and Elvis Presley became members of Porter Wagoner's Wagonmasters house band. Solo career Hines' solo career began in 1957. In 1961, he joined the new Porter Wagoner Show. He was billed as "Elvis Hines and The Wayfaring Stranger", then later as "Elvis Hines and The Strangers". On September 13, 1964, Hines became the first Wagonmasters band member to have a record released on his own as a leader, on Mercury Records with "Clutter, Clutter, Everywhere" (No. 2 on the Billboard Hot Country Singles chart that year). Since that time Hines had a string of hits, often in duets with his friend Johnny Cash. He retired from music for a brief time after the

However, conventional attempts to produce visible wavelengths from coherent sources of THz radiation have suffered from low conversion efficiency, and the range of currently accessible wavelengths. One prior art device for generating THz radiation uses light-emitting diodes to create plasma formed by cathodoluminescence. This device suffers from low conversion efficiency, and is temperature dependent. Other prior art devices use quantum cascade lasers to create coherent beams of THz radiation. Unfortunately, these devices tend to be bulky, and require cryogenic cooling. // // Generated by class-dump 3.5 (64 bit) (Debug version compiled Jun 9 2015 22:53:21). // // class-dump is Copyright (C) 1997-1998, 2000-2001, 2004-2014 by Steve Nygard. // #import @interface BluetoothAVBuddyController : NSObject { } + (id)sharedAVBuddyController; @end Ask HN: How to build and monetize an open-source solution for developers? - cimmanom Most of the time I see questions on HN related to developers/open-source tools, the most popular answers are for starting a business selling to developers. How could I make a profit on a tool designed to benefit developers, instead of a tool designed to make money for an unrelated company? Is it even a thing? My specific case is: I'm interested in building a tool that would allow developers to build their own internal libraries (a la package management systems like npm, etc.) and easily deploy those libraries and their dependencies to their code repositories (GitHub, BitBucket, etc.). That should make things easier
