The application will ask to create an Active Desktop shortcut. Create it and name it "Autocad LSS" (or another one if you wish). Go back to where you've launched Autocad, right click on the icon and select "Create Shortcut". Copy the keygen to the desktop, launch the program and paste the keygen into the field. How to use the crack/patch/serialkey Once you have installed the program, extract the contents of the.zip and run the Autocad.exe to run the software. You will be prompted to either create an autocad shortcut or run the application. Create an Autocad shortcut on your desktop. Open it and enter your license code, which should be in the.txt file located at the same folder as your autocad installation folder. Press OK and you should be able to open the application. If you have problems with this, you may try to install the autocad 15 lss version and run the app directly. Troubleshooting When you launch Autocad, the license status in the lower left corner will show "None". This is normal. Simply make a new shortcut to open Autocad, then enter your code in the shortcut's "Target" field and the license status will change. The status will be "Active" by default, but you can change it to "None" by right clicking on the shortcut and selecting "Properties". If your license key is shown as "None" when you launch Autocad, try the following: Run the Autocad program. This will cause Autocad to ask you if you would like to continue working without the license key. If you confirm, the Autocad program will automatically go online, download and install the license key. When the license key has been installed, the status of the application in the lower left corner will change to "Active". Other issues If you receive an error saying that Autocad is not licensed, then simply wait for a while.
