Effect of a new class of the nonacidic N-hydroxymethyl-5,6-dihydropyrimidine derivatives on the histamine-induced gastric acid secretion in the anaesthetized rats was investigated. The N-hydroxymethyl-5,6-dihydropyrimidine derivatives produce a significant (p 50 mumol kg-1). N-Hydroxymethyl-5,6-dihydropyrimidine derivatives do not change the spontaneous acid output, the histamine H1-receptor affinity, and the binding of [3H]-pyrilamine to rat brain membranes. The results suggest that the antagonistic effects of N-hydroxymethyl-5,6-dihydropyrimidine derivatives of aminopyrimidine type are not exclusively related to the interaction with H2-receptors.Geometric constraints on real-space pairing of electronic quasiparticles in the normal state of high-temperature superconductors. It is shown that the low-energy electron quasiparticles form a Bose-like condensate in the normal state of high-temperature superconductors (HTSCs) if the phase space for such pair formation in the electronic phase space is over-occupied. As an indication of the tendency to such Bose-like pairing, one examines the spatial pattern of the electronic density of states (DOS) along cuts in momentum space of the Brillouin zone. It is shown that, if the DOS along a cut of the Brillouin zone is dominated by a group of parallel lines with a symmetric distribution around the origin, one is strongly inclined to find a symmetric momentum space distribution of the quasiparticle wave function (within the superconducting phase) along the same cut.BJP had an EVM vote In a major upset, the Left front had won 90 out of 91 Assembly seats in the recently concluded elections, gaining a total of 147 of the total 230
